

F3 Technical Advisory Memo

No: TAMF3-2019-004

Date: February 15, 2019

Subject: Ligier Bulletin F3 #1 and HPD Engine Operating Instructions V3

The attached Ligier and HPD bulletins describe a mandatory upgrade to the F3 cooling system.

Ligier will distribute all the necessary parts for immediate installation on all existing F3 cars. There will be no charge. New cars delivered from this date forward will have these parts installed at Ligier.

HPD's Engine Operating Manual has been revised to include the correct cooling system bleed procedure that must be followed with the updated system.

These are Type 1 parts, consistent with 2.7.1 of the FIA Technical Regulations. They must be installed without modification, following the installation instructions in the Ligier bulletin.
