FRONT WISHBONE CLEVIS HARDWARE

FIA Type 1 Update

Ligier Automotive North America will provide new hardware for the upper & lower front wishbone clevises. The new bolts have a shoulder for improved support.

- Upper Clevis Bolts – M8 x 40mm
- Lower Clevis Bolts – M8 x 40mm cut @ 30mm
- Bolts should have 1 thick washer on clevis side, and 1 schnorr washer in between the thick washer and the bottom of the bolt head.
- Tapping the Holes deeper may be needed. If tapping is needed, make sure after the hole is clear of any debris before threading in the new hardware.
- Blue Loctite on final assembly
- Torque Bolts to 26 lb-ft.
